

## Make The Aspens Your Home

The Aspens Living Center is a senior living community that is deeply involved and committed to improving the lives of our elders within our four walls and beyond.

The cities of Burns and Hines are part of the larger community of the High Desert, frontier country of Harney County. Harney District Hospital and High Desert Medical Clinic, located within two miles of The Aspens, are new and modern facilities with a staff of doctors who are interested in geriatric care, and the Veterans' program provides medical care, including a general practitioner and other outreach services.

## The Place To Be

Our staff is trained to respond with courteous, competent and loving care, and our approach to services maintains maximum privacy, dignity, choice and respect for each resident's unique abilities and preferences. If you are looking for Assisted Living in a beautiful setting where you or your loved one feels the comfort and security of home, then The Aspens is the place to be.

## Large Enough To Serve You, Small Enough To Feel Like Home

The Aspens is a welcoming environment for our elder residents, friends and family, and the greater Hines community. From educational outreach, to family-fun activities appealing to all generations, The Aspens is an active and integral member of the community.

Our friendly and knowledgeable staff receive regular professional training and continuing education well beyond what's required for certification or licensing. It's one of the many ways The Aspens is committed to delivering exceptional service. Since our staff retention rate is high, our caregivers get to know each resident in a unique and personal way.
